PROFILE

With more than 7 years of programming experience, combined with strong analytical, communicative and financial skills, I am an ideal candidate. Former colleagues describe me as driven, reliable, a fast learner and a valued team player. I continue to develop myself through videos, documentation, networking, books and courses.

WORK EXPERIENCE

Juni 2024 – Heden
FaceClock

For FaceClock I work 1 to 2 days per week helping with new features and resolving bugs in their time-tracking system. I collaborate with other freelancers to maintain the system.
https://www.faceclock.nl/
Methodology: *Laravel, Filament, Gitlab, PHP, OOP, Agile*

Juli 2023 – Heden
BMP Nederland

1 to 2 days a week I work for BMP Nederland, which has a system for luxury doors. This system consists of various modules such as administration and quotations. I contribute to solutions and implement them using Laravel / PHP.
https://www.bmpnederland.nl/
Methodology: *Laravel, Bitbucket, PHP, JavaScript, OOP, Agile*

Oktober 2023 – Maart 2024
Risk Verzekeringen / Overstappen.nl

PHP / WordPress developer. My work included building (HTML) blocks in the backend and improving them to meet client requirements, as well as devising technical solutions for the backend.
https://www.overstappen.nl/
Methodology: *Wordpress, Bitbucket, PHP, JavaScript, React, Agile*

Juni 2023 – Juli 2023
ESG / Kettlitz

Website and CMS for ESG Kettlitz. Built in Laravel: a CMS and a website fully driven by the backend. Users can log in with Microsoft and edit all website components or add new ones.
https://www.kettlitz.nl/
Methodology: *Laravel, Laravel Filament, VueJS, Tailwind, OOP, Gitlab*

Januari 2022 – Mei 2023
Solera / Nationale Nederlanden Verzekeringen

My work included building insurance scripts in large insurance systems using PHP, providing consultancy to Nationale Nederlanden employees, and processing Excel files via PHP scripts. I regularly collaborated with a developer team, wrote clean and documented code, and helped design new features.
https://www.solera.nl/
Methodology: *Agile; API-Koppelingen; Composer; Gitlab; Docker; XML; Scrum; OOP; MySQL; PHP; Git; MVC; OTAP*

Maart 2021 – September 2021
Helpdesk systeem

Built in Laravel. Modules including Mailing, CRUD and a role hierarchy (admin, helpdesk agent, user). Also implemented Microsoft account login via the Azure API.
Methodology: *Laravel; Agile; Scrum; OOP; MySQL; Relational databases*

Mei 2018 – Januari 2021
Braveboys

Full stack developer at Braveboys.
Methodology: *Laravel; PHP; Agile; Scrum; OOP; Front end development*
